EDUCATION

Virginia State University
Bachelors of Science in Computer Science | GPA: 4.0 | Honors Program Student

- Relevant Coursework: Programming I & II, Adv Data Structures & Algorithms, Discrete Math, Web Programming, Database Systems, Computer Organization & Architecture, Software Development

Expected Graduation, May 2028
Petersburg, VA

PROFESSIONAL PROGRAMS & EXPERIENCE

Controls Engineering Intern | Altria (Philip Morris USA)
Internship

- Developed HMI applications for PLC-controlled manufacturing systems using Magelis HMIs and Vijeo Designer, enabling real-time process monitoring, alarms, and operator controls.
- Executed field validation and QA testing of manufacturing control systems by mapping instrumentation from P&IDs, troubleshooting controls, and verifying process functionality.

May 2026 – Present
Richmond, VA

PlayStation Career Pathways Program
Participant

- Selected for a competitive career development program featuring technical workshops, mentorship, and professional development led by PlayStation engineers and industry professionals.
- Expanded knowledge of software engineering career pathways, technical interviewing strategies, industry best practices, and emerging technologies through immersive learning experiences.

December 2025 – Present
San Mateo, CA

Google Cloud Career Launchpad Program
Participant (Remote)

- Selected for Google's Cloud Career Launchpad program focused on cloud computing fundamentals, infrastructure concepts, and industry-aligned technical skill development.

January 2026 – Present
Mountain View, CA

Goldman Sachs Engineering Summits
Participant (Remote)

- Participated in Goldman Sachs engineering workshops and mentorship sessions focused on technical careers, software engineering practices, and professional growth within the financial technology sector.

December 2024 – March 2025
New York City, NY

PROJECTS

Dualshock / DualSense Input Recorder & Virtual Playback System
Python, ViGEmBus, Pygame, Multithreading, JSON

- Engineered a real-time input capture and virtual emulation suite sampling PlayStation controller states at ~120 Hz and deterministically replaying frame streams through an emulated DualShock 4 HID device.
- Implemented high-precision playback timing, input normalization, and JSON serialization to minimize timing drift and reliably reproduce buttons, triggers, analog sticks, and D-pad inputs.

August 2026

Role-Playing Game (Arcadia)
Python, Object-Oriented Programming (OOP)

- Developed a modular text-based RPG featuring player classes, customizable weapon systems, progression mechanics, and extensible combat functionality using object-oriented programming principles.
- Implemented combat interactions, timing systems, and randomized gameplay mechanics while emphasizing scalability, maintainability, and code reusability for future expansion.

September 2024

TECHNICAL SKILLS

- Programming:** Python, Java, C++, SQL, JavaScript, HTML, R, Ladder Logic, Dart (Learning)
- Controls:** PLC Programming, HMI Development, P&ID Interpretation, QA Testing
- Tools & Software:** Vijeo Designer, Magelis HMI, GitHub, Visual Studio Code, Ethernet/IP
